

LK WELLNESS

A recovery club with a licensed clinic inside it.

4655 Admiralty Way, Suite 210 · Marina del Rey, California · 4,925 SF programmed · $4.75M all equity

lkwellnessmdr@gmail.com

CONFIDENTIAL · PRIVATE INVESTMENT BRIEF · FOR QUALIFIED RECIPIENTS ONLY

POSITIONING

Self-care is already social. Very few rooms are built are built to hold it, and fewer still are licensed to licensed to treat you in one.

THE WESTSIDE IS FRAGMENTED

A patient today who wants to optimize their health must book with a plastic surgeon or med spa for injectables, a recovery studio for contrast therapies, and either a concierge doctor or a primary care provider for labs and hormone analysis. Separate intakes and appointments, all billed and paid for separately. Some clinics have combined a few of these modalities. Most of them are not somewhere you would choose to spend a Saturday morning.

4+

The patient is the coordinator, navigating providers for care that should sit in one place.

24 of 30

Services on the LK menu that require a physician, nurse practitioner or nurse. A recovery studio without a physician can offer 6.

10,488

US medical spas as of 2023, up from 8,899 the year before. The category is commoditizing on treatment alone.

THE INSIGHT

OTHERS PROVED THE FORMAT

Only a licensed facility can deliver it.

SWEATHOUZ

Where a non-medical operator stops. No physician on site means no PRP, no IV PRP, no IV therapy, no neuromodulators, no filler, no laser. A licensing threshold separates the two businesses.

Soho House

Soho Friends is a published annual tier where members buy event invitations, but no club access. Soho has proven members want medical services in the club. IV drips have been offered in London since 2022. Their Venice House opens summer 2027 with a contrast suite, cryotherapy and cold plunges. What all the California Soho House locations lack is physician led medicine.

THE DIFFERENCE

LK was built the other way around.

The others are built around recovery and added medicine where they could. Sweathouz can’t cross the licensing line. Remedy Place and Soho House reach across it Soho House reach across it with IV drips and outside partner affiliations. A licensed medical clinic first, with the club built on top. Diagnostics, treatment rooms, an treatment rooms, an infusion suite and a physician-led team, in place before the first member walks in. They sell visits. We run stress-free care.

TWO LAYERS, DIFFERENT DOORS

MEMBERS ONLY · CAPPED

The Club

Contrast suite · Sauna and cold plunge ritual · The Lounge · Member events · Guest passes · Priority booking · Priority booking · Private buyouts

MEMBERSHIP SITS ON TOP. IT NEVER SITS IN FRONT.

OPEN TO EVERYONE · NO MEMBERSHIP REQUIRED

The Clinic

Aescape Robotic Massage · Ammortal Chamber · Red Light Therapy · Hyperbaric Oxygen · Compression Therapy · PRP: Hair & Scalp · PRP: Face & Aesthetic · PRP: Scar & Skin Repair · PRP: Soft Tissue · PRP: Joint & Cartilage · PRP: Post-procedure · Basic Hydration · Myers Cocktail · Recovery / Hangover · Immunity / High-Dose C · Beauty / Glutathione · Athletic Performance · NAD+ 100mg · NAD+ 250mg · NAD+ 500mg · IM Shot: B12 / Lipo · Therapeutic medications · Botox (15-unit minimum) · Filler (0.5 ml) · RF Microneedling · Laser Platform · Advanced Biometrics · DNA Analysis · DUTCH Plus Test · DEXA Scan

HOW YOU WANT TO FEEL

After years running a medical practice and working on its billing side, we know medicine is organized around procedures and codes. We have watched patients try to make sense of menus written for insurers, not for them. People come in tired, sore, run down, or ready for a change. So we organized everything around five simple goals: Restore, Renew, Recover, Reset and Reconnect.

RESTORE

Regenerative

Six PRP protocols, therapeutic medications, a ten-drip infusion menu and NAD+ by dose.

RENEW

Aesthetics

Neuromodulators and filler, RF microneedling, laser resurfacing.

RECOVER

Recovery

Hyperbaric oxygen, Ammortal chambers, robotic massage, compression, red light.

RESET

Diagnostics

Advanced biometrics, DEXA, DUTCH, DNA analysis. The baseline everything else is measured against.

RECONNECT

The Club

The contrast suite, the Lounge, member events, and guest privileges. The reason your membership becomes part of your routine, not just your recovery.

A LADDER, NOT A GATE

Four tiers, each representing a meaningful step up rather than a repackaging of the last. The accessible annual tier is the entry point; the capped monthly tiers drive the core business.

Day Pass

$75

PER VISIT

- Single circuit visit
- Procedures at list price
- No events or lounge privileges

275 visits/mo

Friends of LK

$300

PER YEAR

- Member pricing on all procedures
- Priority booking window
- Invitations to open events
- No club or circuit access

900 members

Resident

$450

PER MONTH

- Rolling monthly credit bank
- Unlimited recovery circuit
- Member pricing on all procedures
- 1 guest pass per month
- Member events

350 members · capped

Longevity

$1,250

PER MONTH

- Everything in Resident
- Quarterly physician consult
- Annual biomarker panel, DEXA and DUTCH
- Therapeutic medications included
- 4 guest passes per month
- Private buyout privileges

40 members · capped

A three-month initial commitment followed by month-to-month billing. Credits roll over while membership remains active and expire upon cancellation. Freezes with seven days' notice. Tier changes available after the initial commitment.

BEFORE DOORS OPEN

FOUNDING MEMBERS DE-RISK IT

Our first founding members will have joined and paid before we open. That turns the opening months from a projection into real revenue, and it shows us real demand from day one.

150

Founding memberships, hard capped and sold during construction.

$3,600

Prepaid for the first year, a 33% discount against list.

$540,000

Collected before opening, offsetting the construction-period burn.

THE CLINIC IS THE FUNNEL

Because anyone can book a procedure without joining, every non-member treatment is a paid introduction. The conversion path runs conversion path runs in one direction and each step is cheap to take.

STEP ONE

Walks in

Books a procedure or buys a day pass. Pays list price. Owes nothing further.

STEP TWO

Becomes a Friend

$300 a year pays for itself on roughly two procedures. Low friction, high volume, and it captures the database.

STEP THREE

Becomes a Resident

Wants the circuit and the room, not just the treatment. This is where recurring revenue begins.

STEP FOUR

Becomes Longevity

Physician-delivered programming. Hard capped. The highest retention and the highest lifetime value in the building.

4655 ADMIRALTY WAY

The clinic and the club take the second floor of the curved glass building at the head of the basin, with a private terrace over the water.

EQUIPMENT STRATEGY

Purchased where payback justifies it. Wet areas drive cost: plunges, saunas and steam carry a higher per-SF buildout than a dry medspa, which is why the lean case is why the lean case trims the contrast suite before it trims treatment rooms. The wet block, 800 SF: two saunas, two cold plunges and steam on a single plumbing a single plumbing wall, sharing that wall with the locker room. It is the first question we ask about any space.

CAPACITY FOR WHAT WE SELL

Capacity is counted hour by hour for each station, not assumed. Even at stabilization, every station has room to spare.

73%

Recovery circuit utilization

2,345 modeled visits against 3,192 practical capacity, leaving 847 visits of headroom.

83%

Treatment room utilization

419 procedures against 507 practical capacity, leaving 88 slots of headroom.

76%

Red light utilization

650 sessions against 851 practical capacity on 2 on 2 beds, leaving 201 sessions of headroom. headroom.

Practical capacity applies a utilization ceiling to theoretical station hours, because demand concentrates at peak times and nothing runs flat out. Headroom is the growth the facility can absorb without further capital.

A LARGE, FAST, CASH-PAY CATEGORY

Every figure carries its source. Anything we could not source was cut rather than estimated.

SILICON BEACH, AT ITS DENSEST

The facility sits in Marina del Rey, two miles west of Playa Vista and inside the same Westside corridor. Playa Vista is the master-planned innovation district on the old Hughes Aircraft site that became the center of gravity for the Westside, with the Google, YouTube and Meta campuses within a walk of one another. LAX is four miles south and the studios fifteen minutes north.

$129,942

MEMBERSHIP IS NOT ADDITIVE

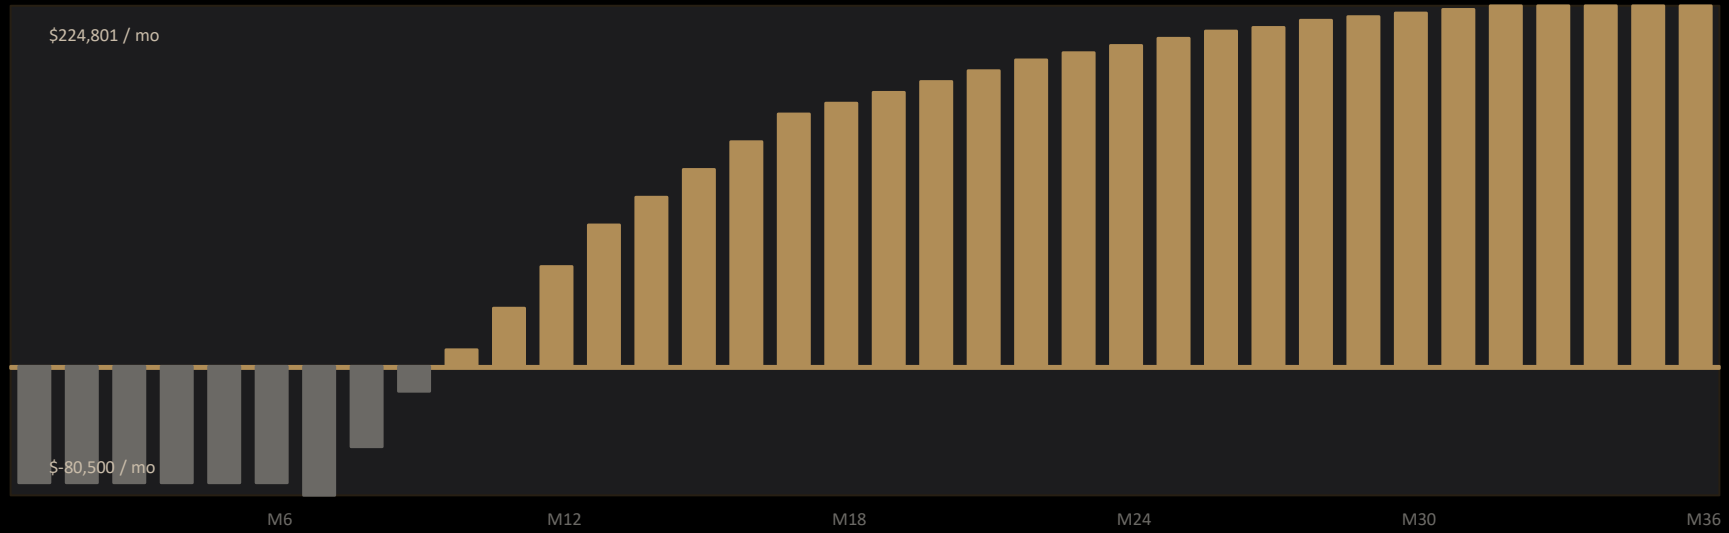

The easy mistake is to stack membership fees on top of full à la carte revenue. Members draw down a credit bank against services that against services that would otherwise be paid at list price, so redemption is netted out first.

BUILD	MONTHLY
Service delivery at list value	$507,121
less member credit redemption	-$129,500
less member and Friends discount	-$30,210
À la carte revenue	$347,411
plus membership fees	$230,000
plus day pass and access	$20,625
Total revenue per month	$598,036

Residents and Longevity members pay $207,500 a month and redeem $129,500 of service at retail. Redemption ratio 62.4%. If that exceeded 100% the credit bank would be underpriced; the model asserts it cannot.

BREAKEVEN AT MONTH 10

Months one through six are construction and founding presales. There is no debt service at any point, so operating income is what the business keeps.

Cash trough $42,467 at month 9, against a $1,105,800 working capital reserve funded inside use of funds.

STABILIZED P&L

MONTHLY, AT STABILIZATION

SENSITIVITY

HOW WRONG CAN WE AFFORD TO BE?

Volume flexed against the base case with fixed overhead held constant, which is the conservative treatment.

LOW

$1.24M / yr

Slow member ramp, 72% of base volume

Revenue / mo	$430,586
Net after COGS	$311,381
Operating / mo	$103,708
Yield on equity	26.2%

BASE CASE

$2.70M / yr

Stated assumptions at stabilization

Revenue / mo	$598,036
Net after COGS	$432,473
Operating / mo	$224,801
Yield on equity	56.8%

UPSIDE

$4.15M / yr

Waitlist demand, 128% of base volume

Revenue / mo	$765,486
Net after COGS	$553,566
Operating / mo	$345,893
Yield on equity	87.4%

THE ASK

$4.75M FOR 30%, RATCHETED

$4,750,000	30%	$11,083,333	$15,833,333
Total raise, all equity	Starting stake	Pre-money valuation	Post-money valuation

All of it is equity, so no lender sits ahead of the investor. The stake starts at 30% and ratchets toward 40% if trailing operating income at stabilization comes in under $2.2M, set out overleaf. At $2.2M, set out overleaf. At base case the round prices at 5.87x operating income, inside the published range for a single location under a strong operator. Indicative terms, subject to definitive terms, subject to definitive documents.

USE OF FUNDS

Working capital is sized against the modeled cash trough of $42,467 at month 9, not to a round number.

USE OF FUNDS	AMOUNT	% OF PROJECT
Buildout and tenant improvements (4,925 SF @ $250/SF)	$1,231,250	26%
Wet areas: 2 saunas, 2 plunges, steam, drainage, ventilation	$465,000	10%
Medical and aesthetic equipment (purchased)	$780,000	16%
Recovery technology: HBOT purchased, Ammortal deposit	$165,950	3%
GE iDXA bone densitometer, purchased	$25,000	1%
FF&E, lounge, millwork, retail	$430,000	9%
Pre-opening: licensing, legal, insurance, hiring	$310,000	7%
Brand, launch, founding member campaign	$237,000	5%
Working capital reserve	$1,105,800	23%
Total project cost	$4,750,000	100%

ALIGNED DOWNSIDE PROTECTION

Ownership is priced against delivery. If the business underperforms, the investor owns more of it.

- Investors start at 30%, priced against base-case stabilized operating income of $2.70M a year.
- If trailing twelve-month operating income at stabilization lands below $2,200,000, ownership steps up on a straight line toward a hard cap of 40%, reached at the low case of $1,244,500.
- At or above base case the investor stays at 30% and the founder keeps the upside. The ratchet only moves one way.

SCENARIO	OPERATING INCOME /YR	INVESTOR OWNERSHIP	INVESTOR CASH /YR	FOUNDER RETAINED /YR
Low case	$1,244,500	40%	$497,800	$746,700
Base case	$2,697,611	30%	$809,283	$1,888,328
Upside case	$4,150,722	30%	$1,245,217	$2,905,505

In valuation terms the ratchet is exactly a halving of the pre-money, $11,083,333 to $7,125,000. It cushions the downside without making the investor whole: at the low case 40% of $1.24M is $497,800, still below the $809,283 that 30% of base case pays.

FUNDED ENTIRELY WITH EQUITY

CAPITAL STRUCTURE	VALUE
Total project cost	$4,750,000
Senior debt	None
Starting stake	30%
Pre-money valuation	$11,083,333
Post-money valuation	$15,833,333
Entry multiple, base case	5.87x operating income
Working capital reserve	$1,105,800
Modeled cash trough	$42,467 at month 9
Equity payback	month 37, extrapolated

CASE	INVESTOR CASH /YR	YIELD	AFTER RESERVE
Low	$497,800	10.5%	7.9%
Base	$809,283	17.0%	12.8%
Upside	$1,245,217	26.2%	19.7%

Founder and operator retains 70% at base case, $1,888,328 a year, and 60% if the 60% if the ratchet reaches its cap.

Yield is the investor share of operating income against the $4.75M invested, assuming it is distributed in full. After reserve holds back 25% of operating income as retained cash for the second location, which is what the pro-rata page depends on. Both are before tax and before maintenance capital.

Cumulative cash across the modeled 36 months is $4,589,439, including the $540,000 of founding-member prepayments collected during construction. No internal rate of return is projected. The paths to value and the published multiples are two pages on.

INVESTING BEYOND LOCATION ONE

This round funds Marina del Rey. Pro-rata rights cover what comes after.

- Location 1 is the proof of concept. It has to open, fill and stabilize before anything else is contemplated, and every figure in this brief describes that one building.
- Round 1 investors receive pro-rata rights, not obligations, to invest in future locations at the same or improved terms, in proportion to their original stake. A 30% holder can maintain 30% of the platform without being required to.
- Future locations target comparable high-income coastal and Westside markets, and only once Location 1 reaches stabilization.
- The 25% expansion reserve on the capital page is what funds that optionality out of operating cash rather than out of a second raise. An investor who would rather take the cash can read the full-distribution column instead; the two are shown side by side because this is the actual trade.

No location beyond Marina del Rey exists today. Pro-rata rights are a mechanism, not a pipeline.

HOW INVESTORS REALIZE VALUE

Three paths, in the order they are most likely to matter.

PATH	HOW IT WORKS
Buyback	The company holds a right, not an obligation, to repurchase investor equity in a defined window in years 3 to 5, priced off a formula tied to trailing twelve-month operating income at a multiple agreed in the definitive documents.
Right of first refusal	If a third-party offer for the business is received, existing investors get the first right to match it before any outside sale proceeds.
Strategic sale	The primary long-term path. Multi-location platforms trade at higher multiples than single-location assets, so the value of building a second and third location is realized at exit rather than only in operating cash.

PUBLISHED EBITDA MULTIPLES	RANGE
Single location, owner is primary provider	3.5x to 5.0x
Single location, strong operator with SOPs	5.0x to 6.5x
Multi-location, two or more with management	6.0x to 7.5x
Multi-location, provider bench and recurring revenue	7.0x to 9.0x
Membership revenue premium	+ 0.5x to 1.0x

LK runs 41.9% of revenue from memberships and access, above the 30% to 40% band that source names as a premium driver.

Multiples: Breakwater M&A, 20 February 2026. https://www.breakwaterma.com/blog/medical-spa-valuation-multiples-2026 · Industry M&A comparables, not company projections. The entry price on this round is 5.87x base-case operating income, inside the single-location band above and below every multi-location band.

FLAGGED BEFORE YOU ASK

- Year 1 operating income is negative. Six of those months are construction and the rest are the opening ramp. There is no debt service to carry through it, and the through it, and the $1,105,800 working capital reserve inside use of funds is sized against a modeled cash trough of $42,467 at month 9.
- The reserve is deliberately larger than the trough it covers, 26.0 times over. With no lender there is no mandated reserve and no covenant to cure, so the cushion is a choice: it funds a slower ramp than the one modeled without a second raise. It is idle cash and we are naming it rather than leaving it to be found.
- The ratchet cushions the downside without making the investor whole. At the low case 40% of $1.24M pays $497,800, which is still less than the $809,283 that 30% of base case pays. Every ownership percentage, valuation and buyback term in this brief is indicative and subject to definitive documents.
- The multi-location expansion and platform exit thesis represent optionality this structure creates, not a guaranteed roadmap. No location beyond Marina del Rey currently exists, and all forward-looking multiples are sourced from industry M&A comparables, not company-specific projections.
- Volume is flexed to 72% of base in the low case and the business still produces $1.24M of annual operating income, with fixed overhead held constant. That is the conservative treatment: in a genuine downside you would cut staff before you cut the lease.
- All forward-looking figures are projections on the stated assumptions and are not guarantees, and actual results will differ. Market and demographic figures carry their sources, and anything we could not source was cut rather than estimated. Statements about other operators describe our understanding at the date of this brief, are drawn from public information and may change without notice. Nothing here has been audited or reviewed by an independent accountant.

TIMELINE

FROM SIGNATURE TO STABILIZATION

MONTH 0 TO 3

Close and design design

Funds close, lease executed, executed, architect and contractor engaged, permits permits filed. Founding member campaign opens.

MONTH 3 TO 6

Build

Buildout, wet-area rough-in, equipment ordered. Medical director and injector recruited and credentialed.

MONTH 7

Open

Doors open to founding members first, public booking the same week. Clinic and club launch together.

MONTH 8 TO 14

Fill

Membership ramp, events programming, referral engine from the open clinic. Operating breakeven lands here.

MONTH 15 TO 36

Stabilize

Caps approached on Resident and Longevity. Waitlist opens.

MEET THE FOUNDERS

LK Wellness is led by two co-founders.

HEALTHCARE ADMINISTRATION AND DEVELOPMENT

Co-founder

One has spent over 14 years in executive leadership of a Joint Commission-accredited, multispecialty outpatient surgery center and medical clinic in Los Angeles. Roles included overseeing operations, finance, and practice management and development, as well as administration for a team of board-certified surgeons across orthopedics, spine, pain management, plastic surgery, and general surgery. That healthcare administration and development background brings licensed-facility discipline to the longevity club model.

BRAND, CAPITAL AND MEMBERSHIP GROWTH

Co-founder

The other founder is a former professional athlete turned film producer, with deep experience in capital raising and marketing, along with strong connections within LA's entertainment and fitness community. This background will be essential in driving the club's brand and membership growth.

Ownership operates an existing surgical practice in Culver City, so this is not a first venture.

THE OPERATING TEAM IS IN PLACE

Clinical, aesthetic, longevity and hospitality leadership are all seated. No key role is open at opening.

SEAT	RESPONSIBILITY	STATUS
Founder & Operator	Operations, brand, capital, compliance	In place
Medical Director (MD/DO)	Clinical oversight, protocols, standing orders	In place
Aesthetics Injector (NP or PA)	Neuromodulators, filler, energy devices	In place
Longevity Clinical Lead	Therapeutic medications, GLP-1 and biomarker programs	In place
Club General Manager	Membership, events, hospitality, retention	In place
Registered Nurses (2)	IV therapy, regenerative, recovery floor	In place

MEDICAL LEADERSHIP

All care is physician-directed, led hands-on by board-certified specialists in pain management, sports medicine, orthopedics, and plastic surgery, supported by NPs and RNs. This clinical structure sets LK apart from the medical spas and wellness centers already in overabundance across this healthcare sector.

WHAT COULD GO WRONG

RISK	MITIGATION
Membership fills slower than modeled.	The clinic is open to non-members from day one, so revenue does not depend on the club filling. The low case flexes volume to 72% of base and still produces positive operating income.
Members redeem more than their fees cover.	Credit banks are sized against measured redemption and the model asserts the ratio stays below 100%. The three-month minimum with 30-day change notice makes repricing operationally possible.
A key clinician leaves during the ramp.	The club, recovery floor and infusion suite run on staff that are easier to hire than injectors and prescribers. A gap narrows the services offered without closing LK. As a licensed, equipped clinic, we can credential a replacement quickly, and clinical pay includes retention terms through the ramp.
The ramp is slower than modeled and cash runs short.	With no loans assumed, there is no monthly payment to miss and no lender involved. Founding memberships will be sold during construction. The reserve is sized to cover a slower ramp, and the low case still reaches positive operating income at stabilization.
Wet-area construction overruns.	The highest variance line in the buildout. The saunas, plunges and showers are the least predictable cost in the build. A reduced-scope plan is ready as a fallback, and the reserve gives room to absorb overruns without a second raise.

THANK YOU

One building, two layers, and a license most of this category cannot legally obtain.

$4.75M all equity · 30% starting stake · 4,925 SF · $224,801 a month at stabilization

Full model, capacity workbook and buildout detail available under NDA.

This document is not an offer to sell or a solicitation of an offer to buy any security. Forward-looking figures are projections and not guarantees of future performance.

HOW THESE NUMBERS WERE BUILT

Everything in this brief resolves to a stabilized P&L and a use-of-funds table. These pages itemize both, every overhead line into its components and every capital line into what it buys, and each build-up is checked at build time to sum to the total it explains. Fixed overhead totals $207,673 a month; rent is 4,925 SF at $5.50/SF/month NNN. The written methodology ships as ASSUMPTIONS.md and methodology.html.

CLINICAL AND CLUB STAFF, $85,920 A MONTH

ROLE	FTE	MONTHLY, LOADED
Officers (2 @ $150,000/yr)	2.0	$25,000
Medical Director (MD/DO)	0.4	$3,000
Aesthetics Injector (NP or PA): $85/hr	1.0	$13,600
Longevity Clinical Lead (NP or PA): $100/hr	1.0	$16,000
Registered Nurse (IV, regenerative, recovery): $55/hr	1.0	$8,800
LVN: $30/hr	1.0	$4,800
Medical assistant / technician: $25/hr	1.0	$4,000
Administrator: $45/hr	1.0	$7,200
Front desk / concierge: $22/hr	1.0	$3,520
Total		$85,920

THE OTHER OVERHEAD LINES

EQUIPMENT LEASES

COMPONENT	MONTHLY
Ammortal chamber (1 unit) financed	$3,000
Aescape robotic massage (1 unit) subscription	$5,000
Second red light bed financed	$1,375
Other leased equipment	$3,000
Balance of clinical equipment financed (~$190,000 @ 2.2%/mo)	$4,180
Total	$16,555

MALPRACTICE AND LIABILITY

COMPONENT	MONTHLY
Medical Director policy	$3,500
Aesthetics injector policy	$3,000
Longevity clinical lead policy	$2,500
Nursing coverage	$1,500
Entity policy and umbrella	$1,500
Total	$12,000

ADMIN AND MANAGEMENT

COMPONENT	MONTHLY
Bookkeeping and accounting	$4,000
Legal and compliance retainer	$1,500
IT and managed services	$2,500
Business insurance (GL, property, cyber)	$1,000
Merchant processing and banking	$9,500
Total	$18,500

UTILITIES, SOFTWARE, MEMBER PLATFORM

COMPONENT	MONTHLY
Utilities (electric, gas, water)	$7,000
Member platform and booking	$2,500
EMR / charting	$2,000
Phone, internet, security monitoring	$1,500
Laundry and linen service	$2,000
Music, AV, miscellaneous systems	$1,000
Total	$16,000

MARKETING AND MEMBER ACQUISITION

COMPONENT	MONTHLY
Paid digital and social	$12,000
Content, photography, video	$4,000
Events and community programming	$5,000
Agency / fractional marketing lead	$6,000
Referral and partnership incentives	$3,000
Total	$30,000

LICENSING AND COMPLIANCE

COMPONENT	MONTHLY
Business licenses and permits	$1,600
CLIA waiver / lab (bi-annual, amortized)	$10
Total	$1,610

WHAT THE MARGINS PAY FOR

Cost of goods runs $165,563 a month against $598,036 of revenue, a blended 72.3% margin. Of that, $18,760 is circuit consumables at $8 a visit across 2,345 monthly visits, carried on its own line in the P&L.

CATEGORY	MARGIN	WHAT THE COST SIDE IS
Recovery	80–82%	Consumables, filters and water treatment, linens, device servicing contracts. Almost no per-session variable cost, which is why these margins are the highest in the building.
PRP	60–72%	Draw kits, separation tubes and centrifuge consumables, needles and sharps, topical anesthetic. Cost per case is close to fixed, so the margin spread across the six lines is a pricing decision rather than a cost one.
Regenerative	56–78%	IV bags and tubing, vitamins, glutathione and NAD+ compound, pharmacy cost on prescribed therapeutics. The widest band in the book: NAD+ carries the compound cost and the hydration drips carry almost none.
Aesthetics	65–75%	Neuromodulator and filler units at acquisition cost, RF microneedling tips, laser consumables, topicals. Filler is the thinnest because product cost dominates a single syringe.
Diagnostics	65–77%	Reference lab send-out fees, DEXA consumables, DNA and DUTCH collection kits, interpretation time. DEXA sits at the top because the scanner is owned and the marginal cost of a scan is small.

IF RENT IS WRONG, WHAT HAPPENS

Rent is the largest single assumption in the model and the easiest to check. Everything else is held constant.

RENT $/SF/MONTH NNN	MONTHLY RENT	OPERATING /MO	ANNUAL	YIELD ON EQUITY
$5.50 (modeled)	$27,088	$224,801	$2,697,611	56.8%
$6.00	$29,550	$222,338	$2,668,061	56.2%
$6.50	$32,013	$219,876	$2,638,511	55.5%
$7.00	$34,475	$217,413	$2,608,961	54.9%

Yield is stabilized operating income against the equity raised, before tax and before any distribution. The modeled rate is the more aggressive of the figures shown; a broker letter or signed lease would replace this assumption with a fact.

THE ITEMIZED CAPITAL LINES

WET AREAS

COMPONENT	AMOUNT
Saunas (2), cedar, heaters, controls	$95,000
Cold plunges (2), chillers, filtration	$70,000
Steam room and generator	$45,000
Waterproofing, drainage, floor slopes	$110,000
Dedicated ventilation and dehumidification	$85,000
Tile, benching, finishes	$60,000
Total	$465,000

RECOVERY TECHNOLOGY

COMPONENT	AMOUNT
Hyperbaric oxygen chamber, purchased	$150,000
Ammortal chamber ($159,500 list), 10% finance deposit	$15,950
Aescape robotic massage (1 unit), subscription only	$0
Total	$165,950

WHAT EACH CAPITAL LINE COVERS

LINE	AMOUNT	BASIS
Buildout and tenant improvements (4,925 SF @ $250/SF)	$1,231,250	Square footage × $250/SF for clinic and club space.
Wet areas: 2 saunas, 2 plunges, steam, drainage…	$465,000	Itemised below. Wet construction is the highest-variance line in the whole buildout: waterproofing failures and ventilation rework are the classic overrun.
Medical and aesthetic equipment (purchased)	$780,000	Purchased portion of the medical and aesthetic package. Excludes bone densitometry, which is itemized on its own line below.
Recovery technology: HBOT purchased, Ammortal deposit	$165,950	Only the hyperbaric chamber is bought outright. The Ammortal chamber is financed, so the capital cost is the deposit alone.
GE iDXA bone densitometer, purchased	$25,000	A GE Lunar iDXA bone densitometer, bought outright rather than leased, plus the 125 SF room it occupies.
FF&E, lounge, millwork, retail	$430,000	Furniture, lounge fit-out, millwork and retail fixtures.
Pre-opening: licensing, legal, insurance, hiring	$310,000	Licensing, legal, insurance binders, recruiting and pre-opening payroll.
Brand, launch, founding member campaign	$237,000	Identity, site, photography, launch campaign and the founding member drive.
Working capital reserve	$1,105,800	Sized against the modeled cash trough, not set to a round number.
Total project cost	$4,750,000	

WHAT RESTS ON JUDGMENT (1 OF 3)

Each figure below is an estimate, an inherited assumption or a single vendor quote.

RENT (4,925 SF NNN)

This is the most exposed number in the model. There is no broker letter, no comparable set and no listing behind it anywhere in the lineage. The prior Playa Vista model implied $6.77/SF, so $5.50 is the more aggressive figure. Sensitivity is shown at the end of this document.

EQUIPMENT LEASES

One Ammortal chamber, not two: $159,500 list including delivery, install and onboarding, a 10% deposit, and roughly $3,000 a month on vendor financing. Aescape cannot be purchased at all, and the single unit runs $5,000 a month on enterprise terms plus $10 for every completed massage, which is a variable cost already sitting inside that service line's margin rather than here. The second red light bed is vendor-financed at $1,375 a month: red light runs 650 sessions a month on the current menu, which one bed cannot physically deliver.

ADMIN AND MANAGEMENT

Merchant processing is the largest component and scales with card revenue at roughly 2.6%. Everything else is a fixed vendor cost.

MARKETING AND MEMBER ACQUISITION

Weighted toward paid digital during the ramp and toward events and referral once the membership base exists. No blended CAC target is claimed, because none has been measured.

MALPRACTICE AND LIABILITY

Priced per credentialed provider plus an entity policy and umbrella.

WHAT RESTS ON JUDGMENT (2 OF 3)

UTILITIES, SOFTWARE, MEMBER PLATFORM

Wet areas dominate the utility line: saunas, plunges and their dehumidification run continuously and are more energy intensive than a dry medspa of the same footprint.

LICENSING AND COMPLIANCE

Routine regulatory carrying cost.

BUILDOUT AND TENANT IMPROVEMENTS (4,925 SF @ $250/SF)

The prior Playa Vista model used $200–$300/SF for comparable clinic buildout, so $250 sits mid-range. It is not a contractor bid; a general contractor bid remains the most valuable document to obtain before closing.

MEDICAL AND AESTHETIC EQUIPMENT (PURCHASED)

Category ranges come from the prior Playa Vista line-item budget: IV and exam $80K–$150K, PRP processing $40K–$125K, aesthetic laser $150K–$400K, RF microneedling $80K–$180K, body microneedling $80K–$180K, body contouring $100K–$275K, diagnostics $80K–$180K. That budget is an internal planning document, not vendor quotes. The diagnostics range above covers diagnostics range above covers biometrics, phlebotomy and the lab interface only: the GE iDXA is named and priced separately so the two cannot be counted twice.

RECOVERY TECHNOLOGY: HBOT PURCHASED, AMMORTAL DEPOSIT

The single Ammortal chamber lists at $159,500 including delivery, install and onboarding, with $15,950 down and roughly $3,000 a month thereafter. Both the Ammortal payment and the Aescape subscription appear in the monthly equipment lease line rather than here, along with the red light beds.

WHAT RESTS ON JUDGMENT (3 OF 3)

GE IDXA BONE DENSITOMETER, PURCHASED

Price supplied by the operator. It is well below new-unit list, so it assumes a refurbished or off-lease scanner: confirm the condition, the remaining tube life and whether a service contract is included before closing. The room it needs added 125 SF to the footprint, which carries $31,250 of buildout at $250/SF; both that and the scanner itself are funded from the working capital reserve, so the project cost is unchanged. Owning the scanner rather than referring out is what puts the DEXA service line at a 77% margin and lets it be priced as a $95 screening entry point.

FF&E, LOUNGE, MILLWORK, RETAIL

Hospitality-grade rather than clinical-grade, because the lounge is the product. Per square foot this is the line most exposed to taste and specification drift.

BRAND, LAUNCH, FOUNDING MEMBER CAMPAIGN

Sized against the founding member target: the campaign has to convert enough pre-opening memberships to matter, and those proceeds are modeled as offsetting construction-period burn.

WORKING CAPITAL RESERVE

This is the one capital line that is computed rather than estimated. The model runs a 36-month cash curve and this reserve must exceed the deepest cumulative shortfall; a build assert fails if it shortfall; a build assert fails if it does not. That is why the figure is not round.
